

# Collinsonia canadensis

## Richweed

Also called horsebalm and stoneroot. A tall woodland wildflower and member of the mint family, this plant has large, toothed leaves and loose, branching heads of lemon-scented flowers in late summer. The leaves are also scented, and can be used for tea. Easy to grow in moist soil and part shade.

**Suggested companions:** lady fern (*Athyrium filix-femina*), blue cohosh (*Caulophyllum thalictroides*), Culver's root (*Veronicastrum virginicum*), oaks (*Quercus* sp.), hickories (*Carya* sp.), sassafras (*Sassafras albidum*)
